Work Experience:

Senior React Frontend Developer
Oxagile - Canada/USA
January 2023 to Present

- Creation and development of business functionality with React JS, React Hooks, TypeScript, Redux.
- Writing unit tests using the library Jest.
- Development of an adaptive website for all types of resolution.
- Creating design system UI components on Storybook platforms.
- Developed the gitlab-ci.yml configuration file for CI running Unit-tests on a project in Gitlab.
- Used SonarQube to analyze website code vulnerabilities.

- Work closely with backend developers on the team to call APIs to develop web pages and JSON contracts.
- I implemented Husky to use Git hooks and run the scripts we need during the push stages to the remote repository to prevent merging with ESLint errors.
- I have experience working with Jira, I know the full life cycle of the feature task/bugs/research task. I have experience setting tasks for related departments in Jira.
- Experience in writing documentation for a site in Confluence.
- Daily use of Agile, SCRUM methodology, participation in team planning and retrospectives.

Technologies & tools used: React JS, React Hooks, TypeScript, Redux, Next.js, RESTful API, HTML/SCSS, Unit-testing, Jest, Adaptive website, Storybook, Git, gitlab-ci.yml, CI, SonarQube, JSON, Agile, SCRUM

Senior Frontend Developer
VEON - Netherlands, Amsterdam
May 2018 to December 2022

- Hands-on working experience with React JS, React Hooks, TypeScript.
- Creating a company website from scratch using ReactJs.
- I was fully involved in transitioning the site's code base from jQuery/HTML/CSS to React.
- Maintain existing React systems, including bug fixes.
- I have completely created dynamic, reusable and adaptable Frontend UI components using Storybook, ReactJS and React Hooks. Supervised the migration of all company projects (more than 20 projects) to use the same components.
- Interaction with the backend using RESTful API.
- Maintaining legacy code and fixing errors using JavaScript.
- I optimized the website by monitoring and eliminating unnecessary React renders.
- Implementation of standards, best practices ensuring code quality and unit test coverage using React Testing Library.
- Skill in using browser developer tools such as Chrome DevTools to measure and analyze site performance.
- Developed in a short time an application for "setting KPI for company employees" using React.
- Experience working with project managers and digital product managers to estimate tasks and prepare sprints.
- Standardized the quality of website code by developing and implementing a unified development process for teams of developers working with a single code base using Git.
- Participation in regular Agile or Scrum ceremonies, such as sprint planning, daily stand-ups, and retrospective meetings.

Technologies & tools used: React JS, React Hooks, TypeScript, Redux, ES6, Jest, Next.js, Node.js, React Testing Library, Storybook, creating UI-components, jQuery, HTML/CSS/SCSS, RESTful API, Agile, SCRUM

Senior Frontend Developer
RAMBLER&CO
April 2016 to May 2018

- Creation and development of business functionality with React, JavaScript;
